Stats: QNI's were higher this month than last by 5 check-ins with QTC's down 10.

Condx were great all month except the other night when I could barely hear anyone. Not sure what was eating everyone's signals but it's been okay since. Things get bad in the winter sometimes and it may have been a precursor of those condx.

Dan N0DA hit every NWN session in October. Nine times we had a great turnout with 10 QNI's. Our monthly average was 8.71 QNI's per night, down from 8.83 the month before.

Last month has been a challenge at the QTH as our sewer line collapsed early in October. We finally got it replaced yesterday. It was 14' deep! That Orangeburg tar-paper pipe was widely used up to the 1970's. Our place was built in 1955. Good run for tar-paper but it finally let go.

If anyone is interested in becoming an NCS, please contact me - Patrick NG7I sbus1313@gmail.com and I'll see about getting you on the schedule. *If you want to try it, just ask.* The existing guys might just let you have their slot! If it turns out to be too much then we'll take it back no problems.

...

Best 73,
Patrick NG7I

If you're not in the Northwest, just think of NWN as "Net Without a Name" -hi
