QNI 265
QTC 58

Stats: QNI's were higher this month than last by 12 check-ins with QTC's down 3.

Fiber internet was installed so I'm free to QRO as needed with changing condx. A few nights were interesting with Don, W7GB sounding like he was in Siberia and he's the closest to me at only 42 miles. The NVIS gets hammered with auroral doppler shift is all I can surmise. Rob, K6YR came in nice and clear during those times too and he's 1,028 miles away from me!

Both Don and Lee hit **every** NWN session in September. A few nights we had a great turnout with 10 QNI's. I keep hoping to get a full house one of these nights. Our monthly average was 8.83 QNI's per night, beaten only by March and June. Maybe at year's end I'll graph it out.

If anyone is interested in becoming an NCS, please contact me - Patrick NG7I sbus1313@gmail.com and I'll see about getting you on the schedule. *If you want to try it, just ask.* The existing guys might just let you have their slot! If it turns out to be too much then we'll take it back no problems.

...

If you're not in the Northwest, just think of NWN as "Net Without a Name" -hi

Best 73,
Patrick NG7I
